**SPECIAL NOTE:**

Please be aware of the following errata concerning the AL3011 PCI PC Only Wireless adapter:

1. To utilize encryption, users must have both the SSID name and the 64-bit or 128-bit encryption key. If you do not know the SSID or encryption key for the router you wish to reach, please contact your network administrator.
2. The Key Phrase feature does not function. To utilize encryption, the 64-bit or 128-bit keys must be used.
3. The AL3011 will function with the Apple Base Station device providing:
  - a. The Base Station utilizes a 64-bit key (10-digits 0-9 and/or A-F)
  - b. The Base Station WEP key is preceded by a "\$" (example: \$24680ABCDE).
4. To install the card under Microsoft Windows NT Workstation, make sure the Network Services have been installed. After Network Services have been installed, shut down the computer and install the AeroLAN PCI card, boot the machine and go back to Network Services. Follow the prompts to install the card.
