

The Simple Way for Macintosh Systems to Share Internet Connections with other Macs and PCs.

FriendlyShare

It's not easy, trying to stay within a budget these days. Especially when technology seems to change almost overnight. That's why Asanté FriendlyShare™ delivers such a great value—today and tomorrow. Let Asanté FriendlyShare help you get the most value from your Internet service.

Cost-Effective

Saving Money, One Month at a Time

Even with a basic 56K dial-up modem, you know that you can share your Internet connection with a few others around the office or home office. All you need is FriendlyShare software to handle all the technical details, like:

Network Address Translation (NAT) – no special proxy software required on client computers.

DHCP server and DNS forwarding – and automatic server configuration for dramatically simpler installation.

Built-in Two-Way Security

Protect your network from unscrupulous hackers with an integrated firewall. Block unauthorized access with packet filtering and dynamic tunneling. FriendlyShare not only protects computers behind the firewall, but it even protects the server running FriendlyShare in front of the firewall.

Safe and Secure

To prevent your users from accessing inappropriate websites, set “black” and “white” access lists. Make a white list entry to restrict Internet access only to selected websites on the list; websites listed on the black list will always be denied access. Fine-tune these access lists by time of day (“no entertainment site access between 8am and 5pm”) and by specific network addresses (“rule applies to all computers, except mine”).

Any Local Network Connection, Any Broadband Internet Connection

Plug in Asanté FriendlyShare into any popular local area network topology. Share Internet connections using Ethernet, Fast Ethernet, Gigabit Ethernet, HomePNA (Asanté PartyLine) or even wireless connections. FriendlyShare works with them all.

When you're ready to upgrade your Internet connection, FriendlyShare is performance-tuned to handle all types of analog modems, cable modems and xDSL.

Free Tech Support

AsanteCare™ Service and Support

Asanté FriendlyShare is backed by a generous warranty and service program. During your first six months of ownership, Asanté provides free technical support and complete warranty service. AsantéCare can be extended for an additional 12 months to cover unforeseen technical issues and version upgrade costs for a nominal charge.

FriendlyShare is ideal for iMac, G3, Powerbook G3, G4, and iBook!

AsantéCare
Asanté's flexible support program includes free telephone support (7AM to 6PM MST) for 6 months and cost-effective options to extend full warranty service to 18 months.

Technical Support
Asanté offers unlimited 24-Hour support via comprehensive BBS, FTP, and web-based systems.

FriendlyShare Internet Sharing
