## ***ISDN ORDERING INFORMATION***

### Description of the FriendlyNET ISDN

The FriendlyNET ISDN is an **Ethernet to ISDN Router** with a built in NT-1 that connects to a U interface. The FriendlyNET ISDN is designed for Internet Access use. It also has **TWO Plain Old Telephone Service (POTS) ports** to connect two analog devices such as a phone or fax. The FriendlyNET ISDN contains all the necessary components to attach your PC's and phone/fax to the ISDN line.

### FriendlyNET ISDN Characteristics:

1. Supports **2B+D BRI** service for voice and data on both B Channels.
2. **Two analog ports** on the unit for phone or fax use.

### Ordering Data with ***Basic Voice Services***:

Easy Ordering Code: **EZ ISDN - 1**

Other Ordering Specifications: **Intel Blue with Data and Voice**

### Ordering Supplementary Voice Services:

(NOTE: Your ISDN provider may charge extra for these services.)

To order Supplementary Voice Services (such as Conference Calling) please send your ISDN provider the Detailed ***ISDN Ordering Parameters*** found in the User's Guide.
