PRODUCT NAME : IntraSwitch 5324 MT Runtime Image Code
REVISION NUMBER : version 1.7
OBSOLETES : version 1.6

OVERVIEW

This is the new software upgrade to the previously released version 1.6 for the IntraSwitch 5324MT.

FEATURES

1. Improved Broadcast storm detection mechanism
2. A new addition of a private mib for retrieving MAC addresses based on port ID.
3. A new addition of a console timeout feature, which is settable via console menu and SNMP agent.
4. A new addition of a storm detection threshold, which is settable via console menu and SNMP agent.
5. A new addition of a storm detection duration, which is settable via console menu and SNMP agent.
6. A new addition of a “RESET SYSTEM” feature in configuration menu to allow user to execute downloading remotely including remote restart.
7. Improved security feature: the request for the user’s password becomes the first prompt to appear after system starts.
8. A new addition of a port status display for all ports in the Spanning Tree menu and help for legend.

COMMENTS

1. HTTP server is disabled in this version for added security.
