

Thank you for purchasing this Asanté FriendlyNET adapter. This release note applies only to:

- **FriendlyNET AL5403-XG wireless adapter**
Part number: 99-00794-01
Sub-assembly: 61-20794-00

Version History

- 1.0 December 2003: Initial release
- 1.01 December 2, 2003: Part number correction

Supported Operating Systems

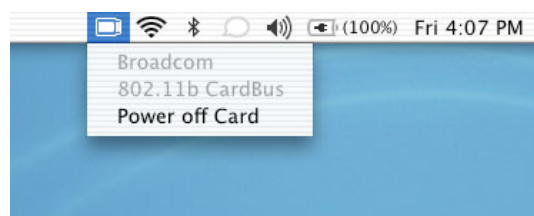

This adapter has been tested on the following operating system and/or applications:

- Apple Mac OS X 10.2.5 with Airport 3.11
- Apple Mac OS X 10.3 (“Panther”)
- Microsoft Windows 98SE and ME
- Microsoft Windows 2000
- Microsoft Windows XP

Special Notes

1. This adapter does not require any driver installation when operating under Apple Macintosh computers running Mac OSX 10.3 and later; the AL5403-XG is supported natively within the OS. Follow the installation instructions in the Asanté *Quick Start Guide* to properly install the AL5403-XG adapter, then configure and operate the adapter the same way as an Apple AirPort Extreme adapter.

2. Macintosh Users: To turn power off the PC card, select **Power off Card** from the PC Card menu (visible when the AL5403-XG is inserted and active).

3. In order to transfer data at IEEE 802.11g (54 Mbps) speed, the AL5403-XG has to be connected to an IEEE 802.11g wireless network. If it is connected to an older IEEE 802.11b wireless network, the AL5403-XG will still function correctly but the data transfer rate will be limited 11 Mbps (802.11b spec).
