

Thank you for purchasing a Voyager I Megapixel IP camera. This Release Note applies only to:

- **Voyager I Megapixel Wireless Network Camera**
Part number: 99-00830

Version History

- 1.34 Sept 2009: Initial release
- 2.00 Jan 2010: Enhanced version with bug fixes
- 2.02 March 2010 : Enhanced version with bug fixes
- 2.05 June 20 2010 : Enhanced version with bug fixes
- 2.06 July 6, 2010 : Bug fixes
- 2.08 Sept 3, 2010 : Bug fixes

Firmware Version

This version obsoletes version 2.00, 2.02, 2.05, 2.06, 2.07. The checksum for the image is as follows.

md5sum = a348fd6fbcd6255d9a242f7c49a3bfcd

Note: The md5 checksum is provided for file integrity purposes. It is strongly suggested that users who have downloaded this firmware from the Internet should run a checksum against the image code to verify it did not get corrupted during transfer/download. The md5sum free utility can be obtained for Windows from the internet.

Installation and Configuration Notes

- The default IP address of wired interface is acquired via DHCP
- The default username is **root**
- The default password is **root**
- Support ActiveX Version : V1.0.23.4

Bug Fixes (2.07)

1. Some information messages have been modified.

Bug Fixes (2.08)

1. The name of the file for recording data is corrected when recording is activated on the Live View page.
2. Label change on the Date/Time page.
3. Fix the problem in netmask setting of the wireless interface with IP Finder.
